

THE KISSANE ROMANCE.

The APPEAL today publishes a full account of the clearing up of the Kissane mystery. If this story be half true, and the truth of none of the statements is questioned, is one of the most remarkable cases of the century. It reads like a novel of complicated plot, and is stranger than the most perplexing fiction.

The sensational developments have been the talk of San Francisco for some weeks, and strangely enough, what was in everybody's mouth was religiously excluded from the newspapers. The intelligence fell like a bomb shell upon the community when it was announced that W. R. Rogers, a millionaire of Sonoma county, alias Kissane, is the brother of Reuben Lloyd, the best known attorney of San Francisco, who changed his name rather than have it linked with the vile record of his brother, who was a murderer, forger, perjurer, thief, arsonist and bigamist.

The identity of the man came to light through the fact that General Darr, whom Kissane defrauded of large sums of money, tracked him down. Kissane refused to make restitution and Darr exposed him. Kissane is an unrepentant criminal, and should be made to answer for his long list of terrible crimes.

The profoundest sympathy is everywhere expressed for Lloyd, who has carried his terrible secret for years, and borne his cross without any showing of its weight, and living within a day's ride of his brother.

Make Your Road Popular.

The Union Pacific passenger rates are five and six cents per mile. Under the present system of issuing first class passes and giving special rates the company actually receives only two cents per mile for carrying passengers. If they apply the Inter-State law literally, without reducing passenger rates, it stands to reason that they will accumulate many shovels. If they reduce fares to two or three cents per mile their trains will go loaded all the time, and they will make just as much money. Reduce your rates and make your road popular.—Ogden News.

Arbor Day.

It is to be hoped that everyone interested in Arbor Day will be at the Courtroom tonight at 7:30. All of the members of the Committee are particularly requested to be present, as it will be the last meeting of the Committee before Arbor Day. Citizens wanting trees for planting will please attend the meeting and let the Secretary know how many trees they want.

—Dr. Conn of Virginia city is trying to explain the most likely place to strike a school boy when administering punishment. He speaks of the "broadest place," but leaves the mind in doubt as to the exact place. When we were licked at school, and we were licked quite often, we know that it was on the bottom round or the educational ladder that we rested, when we had these thrashing teachers to deal with.

—The Carson APPEAL has entered upon its 30th volume. The APPEAL hits us a foul blow once in a while; but we like it, nevertheless because it has the hardihood to take as good as it sends. We hope it will still be banging away at us 20 years hence.—News Reporter.

Wouldn't have hit you in the stomach if you hadn't dodged around so. Lower your guard neighbor and keep up your rates.

—The Stockmen rounds up the newspaper's birthdays and brands them all at once as follows:

The Carson APPEAL, Winnemucca Silver State, Reno Gazette, Reno Journal, and Dayton News Reporter celebrated birthdays the past week. All are excellent journals, a credit to their respective publishers and of great benefit to the communities in which they are published.

—The recent Eastern elections make the candidacy of Henry George for President of the United States more than probable.

—Under the new law freight on flour has been reduced from Sacramento to Reno from \$212 to \$76 per carload.

DEATH IN THE WATER.

IS THE ELEMENT WE DRINK DECIMATING THE PEOPLE?

How a Universal Menace to Health May Be Disarmed.

A few years ago the people in a certain section in one of the leading cities of the state were prostrated with a malignant disease, and upon investigation it was found that only those who used water from a famous old well were the victims.

Professor S. A. Lattimore, analyst of the New York State Board of Health, upon analyzing water from this well, found it more deadly than the city sewage!

The filling up of the old well stopped the ravages of the disease. Not long since the writer noticed while some men were making an excavation for a large building, a stratum of dark colored earth running from near the surface to hard pan. There it took another course toward a well near at hand. The water from this well had for years been tainted with the dainings from a receiving vault, the percolations of which had discolored the earth!

Terrible! A similar condition of things exists in every village and city where well water is used, and though the filtering which the fluids receive in passing through the earth may give them a clear appearance, yet the poison and disease remains, though the water may look never so clear.

It is still worse with the farmer, for the drainage from the barn yard and the slops from the kitchen eventually find their way into the family well!

The same condition of things exists in our large cities, whose water supplies are rivers fed by little streams that carry off the filth and drainage from houses. This "water" is eventually drunk by rich and poor alike with great evil.

Some cautious people resort to the filter for purifying this water, but even the filter does not remove this poison, for water of the most deadly character may pass through this filter and become clear, yet the poison discolored is there.

They who use filters know that they must be renewed at regular periods, for even though they do not take out all the impurity, they soon become foul.

Now in like manner the human kidneys act as a filter for the blood, and if they are filled up with impurities and become foul, like the filter, all the blood in the system coursing through them becomes bad, for it is now a conceded fact that the kidneys are the chief means whereby the blood is purified. These organs are filled with thousands of hair-like tubes which drain the impurities from the blood, as the sewer pipes drain impurities from our houses.

If a sewer pipe breaks under the house, the sewage escapes into the earth and fills the house with poisonous gas; so if any of the thousand and one little hair-like sewer tubes of the kidneys break down, the entire body is affected by this awful poison.

It is a scientific fact that the kidneys have few nerves of sensation; and, consequently, disease may exist in these organs for a long time and not be suspected by the individual. It is impossible to filter or take the death out of the blood when the least derangement exists in these organs, and if the blood is not filtered then the uric acid, or kidney poison, accumulates in the system and attacks any organ, producing nine out of ten ailments, just as sewers and bad drainage produce so many fatal diseases.

Kidney disease may be known to exist if there is any marked departure from ordinary health without apparent known cause, and it should be understood by all that the greatest peril exists, and is intensified, if there is the least neglect to treat it promptly with that great specific, Warner's safe cure, a remedy that has received the highest recognition by scientific men who have thoroughly investigated the character of kidney derangements.

They may not tell us that the cause of so many diseases in this organ is the impure water or any other one thing but this poisonous water with the impurities coursing constantly through these delicate organs undoubtedly does produce much of the decay and disease which eventually terminate in the fatal Bright's disease, for this disease, like among the drinking men, prohibitionists, the tobacco slave, the laborer, the merchant and the tramp, works terrible devastation every year.

It is well known that the liver which is so easily thrown "out of gear," as they say, very readily disturbs the action of the kidneys. That organ when deranged, immediately announces the fact by swollen skin, constipated bowels, coated tongue, and headaches, but the kidney when diseased, struggles on for a long time, and the fact of its disease can only be discovered by the aid of the microscope or by the physician who is skillful enough to trace the most indirect effects in the system to the derangement of these organs, as the prime cause.

The public is learning much on this subject and when it comes to understand that the kidneys are the real health regulators, as they are the real blood purifiers of the system, they will escape an infinite amount of unnecessary suffering, and add length of days and happiness to their lot.

—If any of our hard working men propose to do any prospecting in the surrounding country this Spring or Summer, we advise them to first procure a pair of Tirrell Mountain Boots at Blumenthal & Co's. They are made for the hardest kind of travel, and at the same time, are easy on one's feet.

BERGMAN'S BOMB SHELL

A. Bergman is about to go to San Francisco to purchase new Spring goods. On his return this space will contain his new announcement.

BURLINGTON'S

HAVING RECEIVED A FULL AND COMPLETE ASSORTMENT OF Boots and Shoes of all sizes and descriptions, I would now call the attention of purchasers to my stock. During the history of Carson there never has been a time when such a varied stock of goods has been offered to the public, and at such low prices. It will not pay you to send away for goods in my line, as I can sell you cheaper than you can get elsewhere, and at the same time guarantee a fit. Goods of all kinds made to order and at reasonable prices. Call and examine, as you are not asked to buy unless you are suited. No goods crowded on to customers.

Agent for Laird, Scholer & Mitchell's Celebrated Shoes.

Country orders will receive prompt attention.
